

PROFILE & DIXON SPORTS COMPUTING

SPORTS EDITING AND ANALYSIS SOLUTIONS

OVERVIEW

Watching video of their performances has long been a way for athletes to review their technique and improve their skills. Slow motion is especially helpful for analysis.

For best results, the user interface should be simple enough to allow users without computer skills to operate the system. To hold attention and make the process easier, fast access to desired views should be provided, and training tape preparation and corrections should be quick and easy to make.

Costs must be kept low if systems are to remain affordable for universities and second-tier sports.

Dixon Sports Computing and Profile provide solutions to meet these needs.

Typical Uses

- Professional Sports Teams
- College Athletic Departments
- Professional Athletes
- Sports Stadiums and Arenas

Dixon Sports Computing's Solutions for Profile

Dixon Sports Computing allows coaches and scouts to analyze two or more camera angles of a game simultaneously while only having to log one, so analysis can begin immediately after a play. A simple and affordable coach's station offers superior slow motion. Sports solutions include:

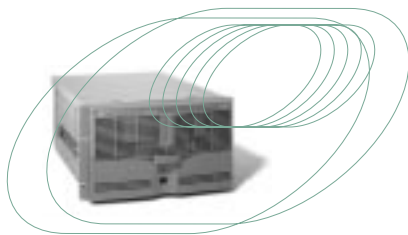

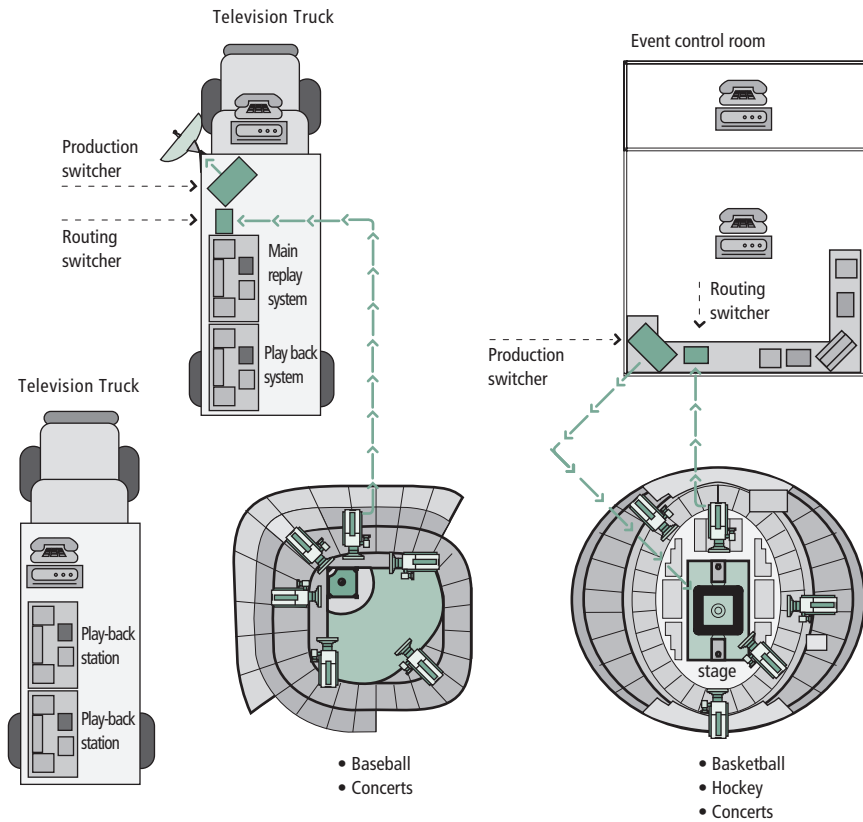

- Dixon Sports Football Editor PS
- Dixon Sports Basketball Editor PS
- Dixon Sports Baseball Editor PS
- Dixon Sports Soccer Editor PS
- Dixon Sports Hockey Editor PS
- Dixon Coach's Station

Benefits

Dixon Sports Computing software offers a video solution designed specifically for the needs of a particular sport, and even the needs of an individual team. A simple interface, combined with minimal tape preparation time, means quick corrective actions and results. Multiple angles provide the most complete analysis available, while slow-motion allows extremely effective analysis. Dixon software is a multi-sport solution that can be used all year. Used in conjunction with Profile, this affordable solution puts state-of-the-art quality within reach of many users, while an open architecture ensures the system will remain state-of-the-art.

LIVE EVENT EDITOR

The Dixon system is the most user friendly and powerful video editor for sports on the market. Its unique, flexible design allows it to easily transition from live action and broadcast replays, to creating high-energy highlight packages on the fly.

PROFILE

Profile Series video disk recorders, servers and media platforms are the most advanced video storage systems in the industry. The key to unleashing their power, however, is the application. With more than 60 application developers worldwide writing software for the Profile family, Profile products can provide you with proven, cost-effective and fully integrated applications to meet your needs.

Dixon Sports Computing has been in the sports video business since 1988, under the same ownership, focusing on solutions for the sports video market. Sports video is Dixon's only business. Dixon's client base currently includes teams in Major League Baseball, the National Basketball Association, the National Football League, major colleges and universities, as well as many major sports arenas and stadiums.
